Applicant
ARIM LIMITED

1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☒ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will usually be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA"). However, this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 56.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of three months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/GB2004/000206

Box No. 1 Basis of the opinion

1. With regard to the **language**, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
 - ☐ This opinion has been established on the basis of a translation from the original language into the following language , which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).
2. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
 - a. type of material:
 - ☐ a sequence listing
 - ☐ table(s) related to the sequence listing
 - b. format of material:
 - ☐ in written format
 - ☐ in computer readable form
 - c. time of filing/furnishing:
 - ☐ contained in the international application as filed.
 - ☐ filed together with the international application in computer readable form.
 - ☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/GB2004/000206

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Yes: Claims	3,4,7-11,14,15,18-22,25,26,29-33
	No: Claims	1,2,5,6,12,13,16,17,23,24,27,28
Inventive step (IS)	Yes: Claims	7-11,18-22,29-33
	No: Claims	3,4,14,15,25,26
Industrial applicability (IA)	Yes: Claims	1-33
	No: Claims	

2. Citations and explanations

see separate sheet

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

1. Reference is made to the following documents:

D1: KRISHNASWAMY A ET AL: "Profile guided selection of ARM and thumb instructions" SIGPLAN NOTICES, ASSOCIATION FOR COMPUTING MACHINERY, NEW YORK, NY, US, vol. 37, no. 7, July 2002 (2002-07), pages 56-64, XP002309544 ISSN: 0362-1340

D2: US-A-6 002 881 (YORK ET AL) 14 December 1999 (1999-12-14)

2. **Item V: Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

D1 discloses an apparatus (and the corresponding method and computer program product) for processing data. Said apparatus comprises: data processing logic operable to perform data processing operations and an instruction decoder operable to decode program instructions specifying data processing operations to be performed by said data processing logic and to control data processing logic to perform said data processing operations (see page 57, paragraph 2.1).

D1 further discloses that said instruction decoder is operable in a first mode in which program instructions of a first instruction set (ARM instruction set) are decoded and in a second mode in which program instructions of a second instruction set (Thumb instruction set) are decoded (see Figure 1 and page 57, paragraph 2.2).

The 32-bit ARM processor, in addition to supporting the 32-bit ARM instruction set, supports the 16-bit Thumb instruction set. Thus the instructions of the Thumb instruction set form, with a subset of program instructions of the ARM instruction set, a common subset of instructions, which represent at least one class of instructions. It is implicit, from the translation of the Thumb instructions into an equivalent ARM instruction (see page 57, paragraph 2.2), that the same data processing operations are performed independent of whether said instruction decoder is operating in said first mode or said second mode and that said instructions of the common subset have a common storage order compensated encoding.

It is to be noted that the features of claims 1, 12 and 23 are also disclosed in D2

which describes two different instruction sets (ARM and Piccolo instruction sets). Since Piccolo is an ARM processor, it executes part of the ARM instruction set, which therefore form a common subset of instructions. Although two different decoders are provided, no difference can be seen with the two different decoder modes of the independent claims which may correspond to several different decoders (see Figure 1 of the application). D2 further discloses that said instructions of the common subset have a common storage order compensated encoding (see column 10, lines 60-62).

As to the dependent claims, D1 and D2 both disclose a fixed length (32 or 16 bits) instruction set. The fact that instructions from the common subset are coprocessor instructions is not explicitly disclosed in the prior art. However coprocessor instructions are disclosed in D2 (see column 5, lines 21-26).

3. **Item VII: Certain defects in the international application**

- i) To meet the requirements of Rule 6.3(b) PCT the independent claims should be properly cast in the two part form, with those features which in combination are part of the prior art (see document D1) being placed in the preamble.
- ii) The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
- iii) The description is not in conformity with the claims as required by Rule 5.1(a)(iii) PCT.
- iv) Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
